Logic wins out. Together, emotions and logic pair to become a decision-making powerhouse. To capture both in consumers, brands must first create an emotional connection between consumer and product (“Just like mom used to make!”) before then highlighting the logical reasons to make that decision (“Now with all-natural ingredients!”).

Natural Logic in NLP Overview Distributed representations and natural logic. In recent work, we have used natural logic and the surrounding task of natural language inference over surface forms as a focus task within an effort to improve (and to better understand) neural network models that handle sentence meaning.

Natural Logic in NLP - The Stanford Natural Language ...

in natural resource management has led to a growing need for a more structured approach to decision making. Improved clarity about key elements in a decision making process can help decision makers focus attention on what, why, and how actions will be taken. Activities in a structured approach to decision making include the following:
